## Introduction

**Plugin Name:** - Forward Comments Required

**Plugin Version:** - 1.0

**Supported version:** - Identity IQ 8.0 or above

**Primary function:** - Once the plugin is installed and enabled, the comment field which appears during forwarding a work-item, will be marked as mandatory. User will not be able to forward any work-item without adding comments from the workitems page.

**Upcoming in next release:** - The current version of the plugin only supports making comments mandatory from the My Work->Work - Items page. The next release will add capability to make the comments mandatory from inside the individual work-items as well.

## Installation & Verification

**Screenshots:-**

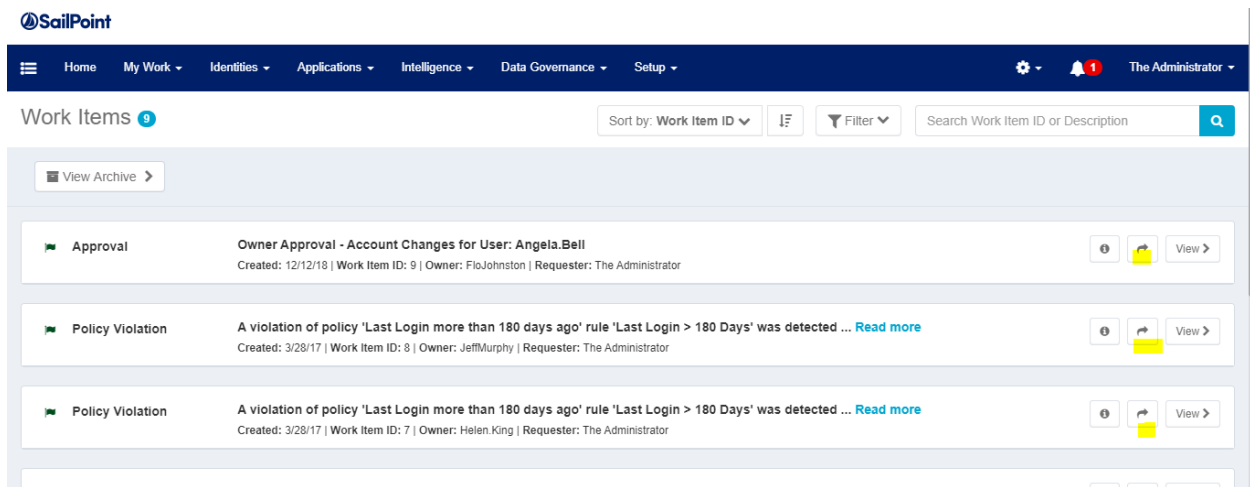

- Plugin Installation: - Simply drag and drop the plugin to install it

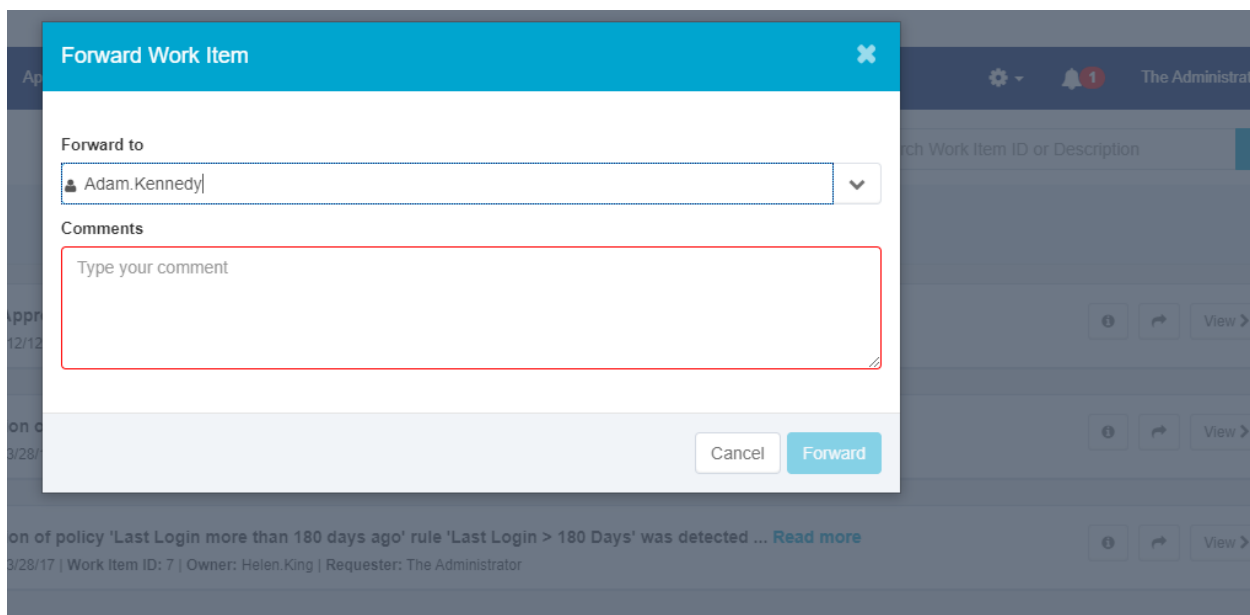

Installed Plugins **1**

Forward Comments Required	
Version	1.0
